Environmental protection plays a key role in the IMO Group.

Right from the start IMO did an excellent and exemplary job on environmental protection, which we continuously improve at our headquarters Gremsdorf. IMO uses an Environmental Management System and is certified according to DIN EN ISO 14001.

We do our utmost to minimize the environmental effects caused by our production. We are also aware of our responsibility for sensitive resource handling.

As a supplier to manufacturers of wind energy turbines, solar panels and tidal stream systems, IMO contributes globally to the expansion of using regenerative energy. With this IMO actively supports climate protection.
